Employment

WebToMed L.L.C., Schaumburg, Illinois

Jul. 2017 - present (10 months)

Full Stack Developer

- Member of a small team that developed 20+ websites and 5+ enterprise web applications for clients in the medical industry with LAMP (Symfony), JavaScript, RequireJS, Gulp and Sass, using Scrum/Agile development methodology with weekly sprints and daily stand-ups.
- Developed application features related to integrating internal API's, complex financial report generation, managing user access with specific roles and e-commerce solutions with code that is well commented, peer reviewed and follows PSR standards.
- Implemented unit tests using PHPUnit. Wrote database migration scripts in PHP.
- Increased my speed of bringing tasks from planing, development to review and close by tracking time while being aware of details and any possible unintended side effects introduced by my code.
- Independently developed a new feature to enable scheduling of recurring credit card payments.
- Developed a new application build pipeline by using gulp task runner that increased page load speed.
- Helped with on-boarding new hires by pair programming and training which allowed them to contribute to the team more quickly and effectively.
- Received excellent feedback and performance reviews from senior developers and techleads.

Freelance Web Developer

Aug. 2016 - Jul. 2017

- Developed 10+ websites for clients from scratch using HTML5, CSS3, Javascript, PHP and Wordpress backend.
- Setup hosting, SSL certificate and domain names for clients websites.
- Communicated effectively with clients in person and remotely and led projects from design phase to deployment.

CatechismClass.com

Jan. 2017 - Jun. 2017

Full Stack Developer Intern

- Maintained and updated custom PHP framework codebase on the production education website with 1,000's of users.
- Responsible for trouble shooting and resolving customer issue tickets using HTML, CSS and PHP.

Zealth Digital Marketing, Roselle, Illinois

Dec 2016 - Feb. 2017

Front-End Developer Intern

- Developed custom websites for clients using HTML5, CSS3, PHP and Javascript.
- Used existing PSD designs to create pixel perfect, responsive websites.

Projects

Code is available to view on GitHub and links to live sites on KonradGnat.com

- **A4M.com** - Part of a small team that developed this enterprise web app with 10,000's users. Took part in implementing the medical provider directory search feature in JavaScript.
- **Tank Battalion** - Developed completely from scratch a 2D single and multi-player game with vanilla OOP JavaScript and the canvas element. It uses SocketIO to connect users in multiplayer mode.
- **ReadBooks** - Developed a web app with user login with social media account, features creating posts and comments. Built with NodeJS, Express, MongoDB and EJS templating engine.
- **GifNotes** - Lead a small team that developed a NodeJS app that creates gifs from video using Gfycat API. Won an award for best new business idea at GIF Hack 2017.
- **Live Sports 360 VR** - Developed a web app that live streams VR video using the Wowza video streaming platform. Won an award at DevWeek Hackathon 2017 in San Francisco.
