Employment

WebToMed L.L.C., Schaumburg, Illinois   Jul. 2017 - present
Full Stack Developer - LAMP, Symfony, JavaScript, React, Webpack, MySQL
- Engaged in development of 20+ websites and 5+ enterprise web applications with a small team using Scrum/Agile development methodology with weekly sprints and daily stand-ups.
- Developed application features including integrating internal API's, financial report generation, managing user access with specific roles and e-commerce solutions.
- Developed a new feature to enable scheduling of recurring credit card payments.
- Developed application features with CRUD (Create, Read, Update, Delete) operations, created new MySQL tables and wrote SQL queries.
- Volunteered to develop a new application build pipeline by using gulp task runner that increased page load speed.
- Increased my speed of bringing tasks from planing, development to review and close by tracking time while being aware of details and any possible unintended side effects introduced by my code.
- Engaged in on-boarding new hires by training which allowed them to contribute to the team more quickly and effectively.
- Implemented unit tests for all new code and wrote database migration scripts.
- Implemented Photoshop designs into HTML, JavaScript, PHP and CSS code.
- Created new newsletter email list integration feature that combined lists from multiple platforms into one.
- Independently developed a Bing map module in JavaScript from scratch that is used live on dozens of client websites, which reduced costs after switching from a preexisting and more expensive Google maps api.

Projects

Code is available to view on GitHub and links to live sites on KonradGnat.com

- *Vitadox.com* (React, Redux, Jest) - Contributed to development of React components.
- *DrLeu.com* (PHP, JavaScript) - Development of e-commerce store using PHP, Symfony and JavaScript.
- *A4M.com* (PHP, JavaScript) - Part of a small team that developed this enterprise web app with tens of thousands of global users. Engaged in implementing the medical provider directory search feature.
- *Tank Battalion* (NodeJS, JavaScript) - Developed completely from scratch a 2D single and multi-player game with the canvas element. It uses SocketIO to connect users in multiplayer mode.
- *ReadBooks* (NodeJS, React, Express, MongoDB) - Developed a web app with user login with social media account, features creating posts and comments.
- *GifNotes* (NodeJS, Express) - Led a small team that developed a web app that creates gifs from video using Gfycat API. Won an award for best new business idea at GIF Hack 2017.

Technical Strengths
